

## On the Subject of Simon Screams

*He's angry! He's furious! He's enraged! He's had it!*

- This module has six lights colored red, orange, yellow, green, blue and purple. These will flash in a sequence that grows longer with each stage (there are 3 stages).
- At each stage, consider the whole sequence of flashes. In the large table, find the first applicable row and the first applicable column. From that entry, take the letter corresponding to the current stage, look at its corresponding column in the smaller table and respond with the correct sequence of color presses.
- Every time the sequence flashes again, your input is reset.

Press the applicable colors from top to bottom  
((R)ed, (O)range, (Y)ellow, (G)reen, (B)lue, (P)urple).  
“#” = serial number. “b.h.” = battery holders.
